

## ERGONOMIC Design

The upright handle is designed to maintain a straight back position to lessen the chance of injury. The length of the handle and the swivel design reduces bending and lessens arm & back strain and fatigue

## PRODUCTIVITY Increased

Now you can vacuum more effectively in less time. The unique swivel head allows easier access to hard to reach areas. The handle easily converts to an extended crevice tool. The side to side action covers more area with less effort. Edge cleaning is a breeze.

## UNIVERSAL Simplicity

The friction fit design alleviates the need for couplers and tool collars. Changing of tools becomes an instant process. Wands fit any 1 1/2" hose cuff. Extensions are easily added for over head vacuuming. Standard floor tool becomes a detailing miracle.
